C.P.R. Vice-President More
Convinced Than Ever.

**GRADUALLY TAKING
UP MIXED FARMING**
Nearly 20,000,000 Acres of
Prairies in Crop This Year
He States.

Winnipeg, June 27.—George Bury, vice-president in charge of the western lines of the Canadian Pacific railway, returned this evening from a very extended trip through the west. He went out via southern Manitoba and Saskatchewan through southern Alberta and the Kootenays, spent some time on the coast, and returned via Calgary, Regina and Yorkton, going over all the new lines under construction.

When asked about the crops he said: "It must be remembered that this year there is one and three-quarters million acres more in grain than last year, Saskatchewan, and Alberta this year than last, making a total crop acreage of about 20,000,000 acres."

From close observation and inquiry from the company's agents and the farmers he came convinced with the fact that there is no hesitation in saying that the country as a whole is making excellent progress, and with average weather conditions the largest amount of grain ever harvested is in sight.

Speaking of the damage reports, which as a matter of fact, are heard everywhere, he said that in such a large area it would appear that there are always some localities where the yield is interfered with from some cause or other but that on the whole he has been successfully going previously, fine yields are being obtained in the distance where proper farming methods have been employed.

In British Columbia it is alleged they have about solved the method of there are low grade ore, of this there are quantities in the West, and the mining experts say with reason that this solution will have a great impact in that part of the country. The prairies, expecting the crops to greatly stimulate the country. The British Columbia is making some progress in agriculture and the fruit crop generally will be a success. Mr. Bury said that in the same period in any other part of the American continent. While on this subject he stated that he had visited the place of one of the largest farmers in Saskatchewan, a man who had made great strides in purely grain to mixed farming in the last two years and was glad to find that the question of cheap, suitable farm buildings had been solved satisfactorily. By the aid of some posts and fence wire and blowing straw over this frame he had made places at the expenditure of a few dollars in which he stored grain successfully and had also made suitable places where he had wintered a large number of pigs besides building a suitable stable for his horses. This would appear to be the question of supplying cheap storage for grain on the farm within the reach of the very poorest and when the method adopted will prevent the dumping of grain on the market in a flood with its reduction in price. He intends to have plans of such structures sent to the various agricultural colleges where they may be supplied to those desiring them. He was afraid the majority of the people in looking at crop movement, questioned the slight of the fact that the railways were faced with a tremendous traffic movement in a few months it meant that the country would be flooded with thousands of railway employees when this movement was over, leaving many of them out of work for many months in the year. With the advent of mixed farming generally this condition will change, the work of these men will be distributed over the greater part of the year and it will make greater stability in the country. He found that many of the industrial bureau and board of trades were giving more time to farming questions and less to efforts to transplanting industries to places where they were entirely out of place at a time in the history of the country. The belief was gradually taking hold that it would be better to develop the country rather than to try to attract a great population

340 NEW BRIDGES CONSTRUCTED BY GOVERNMENT IN 1913

Annual Report of Department of Public Works for Alberta in Press—Large Amount of Work Done on Highways—Department Regrets Lack of Co-operation in Some Municipalities.

The annual report of the department of public works for Alberta is now in the hands of the printer and will be issued shortly. The summary of the work of the department prepared by John Stocks, deputy minister of public works, contains the following:

"The work of the department was carried on throughout the year without serious interruption of any kind and satisfactory progress was made in all branches of the work.

In the highways branch the bridge construction crews were employed to good advantage. While the total number of bridges dealt with during the year was somewhat smaller than in 1912, there were several important permanent structures completed which more than made up for any diminution in numbers. In all there were 440 bridges dealt with of which 35 were repaired, 24 steel bridges and 316 wooden bridges were constructed.

Demand for Bridges
"In the construction of small bridges the department cannot keep pace with the demands of the country. While the need for this class of work is so great in the newer settled districts, the necessity for large and permanent structures in the settled portions of the province are so pressing, that the maintenance of smaller bridges and eventually their reconstruction will soon have to be provided for by the local improvement and municipal organizations.

"There were 11 new ferries built and installed during 1913. In addition to those there were six new ferry boats built to replace those that were worn out.

"There were 60 ferries in the province at the end of 1913 as compared with 49 at the end of 1912.

A large amount of trunk road work was carried on during the year, and a large amount of work was done on roads other than trunk roads.
"In view of the fact that the province is just commencing to settle, the settlement and opening up of the country must extend over a period of years, the policy of the government has been to open up, as far as circumstances permit, passable roads where communities are forming, and to construct trunk roads as the country has been opened up and the farms become more productive, the people would be perfectly well off.

"The surrounding country would support. Had this policy, which has been consistently preserved, been followed earlier, there would not be the disappointment that is found in some places at the present, and for which every cause but the right one is blamed.

Mr. Bury was quite ready to discuss conditions in the west. "I wish," he said, "to emphasize more than ever my firm conviction that until there is cheap power and many other things, population in this country there will continue to be a lack of adjustment of the work of these men will be distributed over the greater part of the year and it will make greater stability in the country. He found that many of the industrial bureau and board of trades were giving more time to farming questions and less to efforts to transplanting industries to places where they were entirely out of place at a time in the history of the country. The belief was gradually taking hold that it would be better to develop the country rather than to try to attract a great population

"The annual report of the department of public works for Alberta is now in the hands of the printer and will be issued shortly. The summary of the work of the department prepared by John Stocks, deputy minister of public works, contains the following:

"The work of the department was carried on throughout the year without serious interruption of any kind and satisfactory progress was made in all branches of the work.

In all there were 440 bridges dealt with of which 35 were repaired, 24 steel bridges and 316 wooden bridges were constructed.

CITY EDUCATION MORE EXPENSIVE THAN IN VILLAGE

Interesting Comparison Made in Report to School Costs in Alberta.

**URBAN SCHOLARS NOW
EXCEED RURAL PUPILS**
Year of Marked Progress Educationally Recorded in Annual Report.

A year of marked progress and expansion in the school system of Alberta is recorded in the annual report of the department of education which is just going to press and will be issued to the public shortly. During the year 1913, the number of schools or departments actually in operation exceeded the corresponding number for 1912 by 352, while the increase in the number of pupils enrolled 8,885 or about 12.4 per cent over the preceding year.

The number of schools or departments in operation in 1912 was 2,311 as compared with 2,276 in 1912. The total number of pupils enrolled was 75,709 in 1913 and 73,044 in 1912.

The total amount of the year amounted to \$479,945, an increase of \$49,012 over the preceding year.

Many New Schools
One of the outstanding features of the year was the remarkable increase in school buildings, especially in the larger centers. This fact was evidenced by the school defectors registered during the year and which amounted to 10,100, 14,000, 16,000, or more than twice the total registered during 1912.

The total amount of the year amounted to \$479,945, an increase of \$49,012 over the preceding year.

Male Female Male Female
1913 — 741,68 601,63
1912 — 712,46 584,78

Rural and Urban
Since the organization of the province in 1905 a fairly equal balance has been maintained between the urban and rural school population. According to the last returns the urban school population is slightly in ascendancy. From the inauguration of the province until last year the rural school population had always been in greater than the urban school population. The figures for 1912 and 1913 are as follows:

Rural Urban Total
1912 12,105 10,825 22,930
1913 12,105 10,825 22,930

Cost of Education
The total cost to the province and rural school districts of all classes of schools under the direction of the department averaged 440.19 per year per pupil. Owing, however, to the fact that the average daily attendance is much less than the total enrollment and to the additional fact that many of the schools are operated during a portion of the year, the annual cost per pupil, based on the average attendance rather than on the enrollment, is found to be \$46.50 per year, or 35.2 cents per day.

A further study of the question of cost has been made with a view to obtaining advice for the maintenance of an ample teaching force. The additional teachers required to provide for ordinary expansion of the new schools from the schools of the province, and opportunities in other directions where the province is in the process of expansion, will be met by the admission of teachers from other provinces and other countries.

During 1913 the number of teachers receiving from the department of education regular certificates of qualification were as follows:

Total Alberta trained	154
First class	154
Second class	154
Third class	154
Out of a total of 150 teachers who	

PASTOR'S DAUGHTER ACCUSED OF THEFT, HELD FOR HEARING.

MRS. ANNIE IRVINE RONEY CHAPIN.

New York, June 27.—Charged with stealing \$100 from a young woman boarding in her home, Mrs. Annie Irvine Roney Chapin, daughter of the Rev. Dr. N. W. Irvine, a priest in the Russian Greek church, who in 1900, was removed as rector of St. John's Protestant Episcopal church for conduct said to be unbecoming his calling, was held in \$1,000 bail by Magistrate Street in West Farms Court.

Dr. Irvine was indignant over his daughter's arrest, and insisted in telling the court what he thought of "those who had engineered it."

"The charges have been trumped up to persecute a poor woman," he said. Miss Minerva Irvine, who lived at the Chapin apartments, said Mrs. Chapin walked off with \$100 she gave her to keep, and also took nearly \$1,000 worth of jewelry and clothing.

Third Violent Storm in a Week—Fields Deeply Buried in Undersand and Mud—Not Only Are Crops Ruined, But the Land is Seriously Damaged Permanently.

Lacrosse, Wis., June 27.—The third violent storm of the week today devastated large sections of Wisconsin, Minnesota and Iowa. Though less severe on electric companies than the second of Wednesday morning, today's storm did far more damage generally. Water ran from two to four feet deep in the streets of La Crosse. The Burlington-St. Paul, Northwestern and southeastern railways all experienced severe wash outs. In spots 100,000 feet of track taken out. Train service was crippled in all directions. At Freeburg Minnesota the tracks are today under four feet of water. At and around New Albin, and Lansing, Iowa, the river overflowed their banks and neighboring fields for miles were deeply buried under sand and mud. Not only are crops destroyed but the land is seriously damaged permanently by the light sand being cast upon it. In Houston, and Winona counties, Minnesota, Almarco county, Iowa, and Lacrosse and Vernon counties, Wisconsin, deep gulches are torn

through the fields while in the valleys many a hay crop was ruined. At Virgo the big Lavoie tobacco factory was blown down. The damage of Rev. Mr. Hoffman was struck by lightning and partly consumed. In Iowa the storm of Wednesday morning today storm did not interfere greatly with telephone and telegraphic service and reports shut off places on the previous occasions came in rapidly.

Engineer Is Congratulated
Pittsburg, Pa., June 27.—Stopping a fast passenger train in time to save it from 15 tons of solid steel falling from a height of 125 feet, was the act of B. C. Ripley, a Pennsylvania railroad engineer and which he was congratulated for.

obtained certificates during the year. 313 received at least a part of their education in Alberta while the others hailed chiefly from the other provinces of Canada and the British Isles.

CROPS WERE BADLY IN NEED OF RAIN THAT CHANGE CAME

Reports From Calgary, Lethbridge, Medicine Hat Are Promising.

**NORTH AND CENTRAL
PARTS WELL SUPPLIED**
Excess of Moisture Not Likely to Harm Cereals at This Stage.

While Edmonton district has been having an over-abundance of rain the crops in southern Alberta were in need of moisture. Heavy rains were reported from all parts of southern Alberta on Thursday and it is now stated that the crop is saved and promises well for a good yield.

"The rain in the southeastern part of Alberta was the salvation of the farmers in that part of the country," declared W. J. Treigle, president of the United Farmers of Alberta. While the country was very dry, said Treigle, crop which had been put in after a summer fallow was in good condition, and he is positive that such land will produce big crops. There has been much more summer following down in all parts of Alberta this year than ever before.

Beneficial Rains.
An inch of rain fell on Thursday in the Lethbridge and Medicine Hat districts, and heavy rains were also reported at Calgary and Medicine Hat. With the exception of a small strip along the international boundary north of Medicine Hat and Mactled the conditions are now regarded as favorable for a splendid crop.

The rainfall all over the northern and central parts of the province has been heavy. Much more rain than was needed has fallen, although before the rains came the land was fairly dry and moisture was needed. In the present stage of growth the excess of moisture is not likely to do much harm, and if dry, warm weather ensues the surplus moisture will soon be got rid of by percolation and evaporation, in which case the crops should give a record yield. There should be a abundance of hay and fodder crops in the north and central parts of the province, while the cereal crops are also in good shape.

June a Wet Month.
Reports of washouts along the C. N. R. line at Athabasca Landing are being received in regard to the fields are partially submerged.

S. M. Holden of the Edmonton Meteorological office reports the rainfall up to today for the month of June has amounted to 8.55, which is the highest since 1905, and in the last thirty years, with the exception of July, 1901, when 11.18 inches fell.

SERIOUS DIFFICULTIES ARISE BETWEEN PANAMA AND THE UNITED STATES

Panama, June 27.—Difficulties of a serious nature in regard to the affairs of the American-Panama joint land commission have arisen between the American and Panamanian members. The entire matter has been referred to Washington in the hope that some basis for the restoration of harmonious relations may be reached.

It is understood here that the attitude of the Panamanian commissioners has caused much annoyance to the American commissioners, who, it is said, declare that the Panamanians insist on compensation for complainants already once paid for their holdings. Insured and uninsured lands, the latter situated on lands flooded when the lake reached the 85 foot level.

The American commissioners declare that the claimants were warned to keep off zone lands after the first settlement.

ACCEPTS CITY'S OFFER OF \$20,000 IN LIEU ALL FUTURE CLAIMS

At a special meeting of the commissioners this morning, E. Harris accepted the city's offer of \$20,000 covering damage in depreciation of property near the overland bridge. City Solicitor Town was instructed to prepare the necessary release relieving the city of any future claims in regard to the matter, once and for all. The property in question is situated at the corner of 10th street and Victoria avenue.

Federals Desert Wounded
Zacatecas, June 27.—Deserting their wounded and abandoning their supplies, the survivors of General Harrison's once powerful army is today bearing heavy casualties closely pursued by Villa's cavalry. When overtaken yesterday the Federals deserted their wounded.

FURTHER EFFORT TO STOP POLICE INVESTIGATION

H. A. Mackie, Acting for William Wheeler, James Walker Turner and Hector Chevier Gets Leave to Appeal Decision of Chief Justice Harvey and to Change Venue of Hearing From Edmonton to Calgary—Rumored That More Clubs May Lose Licenses—Commissioner Booth Swears Policy of Administration Was to "Clean Up the Town."

Mr. Justice Walsh yesterday granted leave to appeal the decision of Chief Justice Harvey dismissing the application of William Wheeler, James Walker Turner and Hector Chevier for an injunction to restrain Mr. Justice Scott from proceeding with his inquiry as far as it concerns criminal charges, which may be preferred against those making the application.

The venue of the hearing will be transferred from Edmonton to Calgary, and the judges will probably hear the appeal at the end of the present month. These include Mr. Justice Scott, Mr. Justice Stewart, Mr. Justice Simmons, Mr. Justice Walsh and Mr. Justice Black.

H. A. Mackie is acting for the applicants in their appeal.

Licenses May Lapse.
A rumour is current in the city to the effect that as a result of the facts that have come to light during the police investigation the licenses of some of the clubs of the city will not be renewed when they expire at the end of the present month. These include, it is stated, the Dominion club, First street; the Opus club, Jasper street, and the Commercial, over the Quill cafe.

The police investigation commenced yesterday afternoon till Monday afternoon at two o'clock. Some of the witnesses whose names have been mentioned in the past, and who had expected to call were not in attendance yesterday afternoon and so Mr. Higgins set to the end of the program for this week by four o'clock yesterday.

Alderman Clarke requested that if possible the hearing be held on Monday morning, owing to a court of revision and he wished to be present. Justice Scott therefore adjourned until Monday afternoon.

Commissioner Booth has further expressed by Mr. Higgins as to his orders to the Chief Justice in regard to license of the clubs. Mr. Higgins asked what information Mr. Booth was going upon when he wrote letters to Mr. Booth on May 26th and again on May 27th, in instructing the chief to take immediate action.

Wanted "Come Back"
Mr. Higgins: You mentioned yesterday the Grand View Hotel, St. Regis Hotel, the one on First and River, and the Brown Hotel. Witness: The one on the corner of First and River was told me by a reporter of the Journal. At the St. Regis Hotel I did not think there was anything wrong, but the wife of a policeman told me that the wife of the Grand View Hotel I saw game, sports looking men around there and I saw a couple of men in a room with a window, but I did not see them doing anything wrong. I did not go to get a "come back" from them.

Mr. Higgins: In both letters you were going to request your knowledge for the purpose of securing license to activity?—Absolutely.

Witness denied that he asked Lancy to request Carr to stop drinking to do with Seymour's promotion.

In reply to Mr. Higgins, witness said he understood that a man named Lancy was prostituting himself could not be proceeded against legally. That was why he defied him to go to the courts as places where there were "two or three women." His idea was to go "after the bigger game."

"Clean up the Town"
"I never had any such policy outlined to me and I never had any such instructions from the Mayor. I never discussed any such policy with the Mayor or with Lancy," said witness in reply to Mr. Higgins' question as to whether he had discussed the policy of the administration to let the houses alone unless they were nuisances.

"From your conversations with the Mayor what did you think was the policy of the administration?" "To clean the town up."

"Witness denied that he asked Chief Lancy to keep Coleman on the force."

Regarding the relations of himself and the Committee of Health, and Secretary witness said the Committee had never attempted to interfere with him in the discharge of his duties.

Alderman Clark asked Commissioner Booth if he had ever discussed the "Gates Alar" policy with him and witness said he never had.

Aubrey Young, a youth who said he was 21 years of age and was employed in Cecil A. Crook's shooting gallery, 539 First street, was there as an electrical repairer.

Mr. Ewing: "What games were carried on there? Bill rack game, rolling down game and race game?" "Yes, all of them," said the youth.

A good deal of amusement was caused by the fencing manner in which the witness replied to Mr. Ewing's questions. He said he had been there nine months, yet he "only spoke to the proprietor once in six months."

Witness improved Mr. Ewing's education in shooting galleries and the games of "bill rack" and "rolling down game."

Did you ever hear of a man losing a big sum?—No; nothing to amount to anything.

What would "not amount to anything"?—About three or four dollars. It is an immense loss to spend it in shooting gallery than to blow it in over the bar.

Witness said a detective had spoken to the manager to close up the "rolling down game." Asked what detective had attempted to close the game, witness said he did not know. There were so many plain clothes it was hard to remember any of them. He never heard of \$400 being lost.

Mr. Ewing: What kind of a game is the rolling down game? It is a "square game." Witness: It's played with round balls (laughing).

Witness denied that anyone had spoken to him about an arrangement with the police. He said that a man named MacDonald had spoken to him, saying that he was surprised at the way he was in a shooting gallery. Witness replied that it was "not what other people thought, but what he thought."

Mr. Ewing: Why did he say that he was surprised?—I don't know. The MacDonalds are very religious (laughing), but I don't think he keeps the ten commandments (laughing).

Did you ever hear of a man losing a big sum?—No; nothing to amount to anything.

Doings of the City Council

Increase in telephone rates adopted. New rates will go into effect July 1.

Program of paving and concrete walks for 1914 passed as recommended in report of commissioner of public works.

Alderman May gives notice of inquiry as to cost of construction and loss in operation of street railway on Athabasca, from 24th to 42nd streets.

Bylaw regulating sale of firewood and amendment to pound bylaw both passed second reading.

Finance commissioner's report for May disbursements adopted.

Special committee's supplementary report on elective commission charter laid on table for further consideration.

Request that city assume cost of current required for exhibition of photo drama, "Creation" turned down.

Report of commissioner of operation recommending passing of necessary bylaw closing 4th street, between McLeod avenue and the river, adopted.

COUNCIL ADOPTS PAVING AND PROGRAM FOR 1914 BY CITY COUNCIL

Work on Both Streets and Sidewalks Will Be Started in City at Once.

SPECIAL REPORT ON
ADDITIONAL LATER
AMENDMENT SMALLER
ADVANCE DEFEATED

Amendment of Alderman Calder to Refer the Same Back Is Lost on Vote.

Both the street paving and concrete walks programme for 1914 were adopted by the city council at the special meeting held last night. The original programme was for the paving of 275,000 yards of paving. This was, however, subsequently revised and cut down to 100,000 yards, supplemented by 27,000 yards laid over unfinished from last year. The total that will therefore be carried out this season is 127,000 yards.

It was moved by Alderman Clark, seconded by Alderman May, that the committee of public works be instructed to bring in a special report on the possibility of paving the following streets later this season, in addition to the regular programme: 190th street, from Jasper north to McKenney avenue; 8th avenue, from Main street west; 5th avenue, 5th street west to 8th street; 31st street as planned in original estimate; 2nd street, from 1st street to 2nd avenue south, and 10th street, southward. Carried.

Alderman Clark emphatically stated that the programme for 1914 as brought down in the report of the commissioner should be adopted at once. It was time to get busy, he said, as matter had been held back too long now. There were only two and a half months left in which the work could be done. Every minute further delay meant that much less chance of getting the work done before winter contemplated this year. It would be very foolish not to do so. The money was here, and the work was waiting for work and it should be gone ahead with and given them.

White Avenue should not be given precedence over other streets named in the additional list. He would therefore move in amendment that the report for 1914 be referred back until the special report was brought down and then the council could vote on it.

Alderman Clark called attention to the fact that the special report need not be submitted to the council until July 1, and that by that time the commissioner of public works would be in a position to judge better as to how the work was progressing.

Alderman Douglas seconded Alderman Clark's amendment, saying that the committee of public works should proceed with it at once. The motion carried.

The concrete walks were taken up next by Alderman Clark, who said that he was sure that the city would be in a position to judge better as to how the work was progressing.

LARGE DEBENTURE ISSUES SOLD TO EDMONTON FIRM

Local Roman Catholic Separate School District Disposes \$150,000 Block.

PURCHASES \$170,000
MOOSE JAW 40 SIXES

Alberta School Supply Company Takes \$237,400 Worth in 30 Days

That Edmonton is becoming a financial center of importance in the dominion, and one of the very foremost in the west, is well shown by the fact that the local supply company has purchased the debentures of the Roman Catholic Separate School District, No. 22, of Moose Jaw, Sask. The bonds run for 40 years, with six per cent interest, and the issue taken by the Edmonton firm amounts to \$170,000.

That is one case in which the Alberta School Supply company has been successful in the most favorable market, thus bringing much capital to the province.

It was the successful tenderer for the debentures of the Edmonton Roman Catholic Separate School District, No. 22, of Moose Jaw, Sask. The bonds run for 40 years, with six per cent interest, and the issue taken by the Edmonton firm amounts to \$170,000.

ISSUE ENTIRELY NEW IN HISTORY UNITED STATES!

Alien Land Law Again is Brought Prominently Before the Public, But This Time in an Absolutely Different Light Regarding One Phase—Absorbing Interest in Washington.

Washington, June 27.—Japan's protest against the California alien land law, brought conspicuously before the public again by the publication of the correspondence between the Washington and Tokio governments, is being discussed with absorbing interest here in official circles. Secretary Bryan has issued a note of June 19 last, which re-opened the subject after nearly a year had elapsed since a former communication had come from Tokio, which was made public with the American reply within a few days. In the meantime he had not talked about the contents of the exchanges. It is known, however, that Japan, abandoning the idea of reciprocity with respect to the separate states.

This, it was pointed out, appeared to be a distinct reservation by the Japanese government of the right to retaliate directly upon the Californians by singling them out among American citizens for exclusion from the right to possess real property in Japan.

On phase of the negotiations distracted particular interest in official circles was said to suggest the possibility of an issue entirely new in the history of the United States. In Italy, in connection with the promise of Japanese government to grant land ownership to the Americans, appeared the words, "reserving for the future, however, the right of maintaining the condition of reciprocity with respect to the separate states."

This, it was pointed out, appeared to be a distinct reservation by the Japanese government of the right to retaliate directly upon the Californians by singling them out among American citizens for exclusion from the right to possess real property in Japan.

There is but one remedy," this note said, "and the imperial government are unable to escape the conclusion that the duty of applying that remedy devolves solely on the government of the United States or the measure complained of, despite the protest lodged by you, has been permitted to go into operation."

OLD WORLD NATIONS PLAY THEIR PARTS IN NEW YORK PAGEANT.

RUSSIAN CHILDREN DANCING.

New York, June 27.—"A Festival of Nations," a pageant given on the East Side under the auspices of the People's Institute, opened this week.

Every night of the festival dances and songs of the nations will be given at Public School 62, at Fourth street and First Avenue, by the immigrants and their children. These will be interspersed with addresses by well-known men and women.

One of the evenings will be devoted to a "Slavic" celebration. Russians, Poles, Croations and Bohemians will show their peasant dances and sing their songs with a dash and vim.

TOO LATE FOR CLARIFICATION.

HEAVY RAINS ARE REPORTED IN ALL NORTH DISTRICTS

Flats at Peace River Crossing Flooded and Stores Lose Money.

BELIEVED BUSINESS WILL MOVE UP HILL

Town is Fast Assuming Proportions of Great Country's Metropolis.

Travelers and settlers coming down from the Peace River country report that the north has not been immune from the exceptionally heavy rains which have characterized Central Alberta during the past few weeks. The roads are, for the most part, in almost impassable shape, following the latest deluge the worst roads known and bridges have been swept away in many districts.

At Peace River Crossing the flats have been, it is said, almost flooded out, and the bridge across the North Hart river, which connects one part of the town with the other, is destroyed. Some of the business establishments, which have greatly increased this spring and summer, are losing thousands of dollars through damage by the rising flood.

It is now believed that the business section of Peace River Crossing will eventually move up the hill, as it did in Edmonton and other cities which first were on the river flats. In fact, many have already purchased sites for business above the hill, especially Main street, which some predict will be the future Jasper avenue of the Crossing.

There is a further reason why the retail section of Peace River Crossing should be above the flats and that is that the flats themselves will all be flooded. It is stated, for warehouse and business property, as the Peace is a navigable river for hundreds of miles north and west of the Crossing, where a big bend occurs and where the Snikely empties into it.

On the west, or north, side of the river, the hill is not abrupt, but is virtually in three great steps, and it is believed that the residential section on that side of the river will be about three miles back from the Peace. At the present the business is on the east side.

The Crossing today shows signs of becoming the metropolis of a vast growing empire. A grading camp is now within its miles of the town, grading for Canada Canal, a branch of the Edmonton, Dunvegan and B. C. railway, which is now completed, except for ballasting and a bridge across

SUNDAY AFTERNOON CONCERT AT THE EXHIBITION PARK

Marie March—The Citadel. • Ringlet. • God Save the King.

Terrific Heat in St. Louis.

St. Louis, June 27.—A week of extremely hot weather reached a climax here yesterday when the government thermometer registered 101 degrees on the top of a 25 story building. The government thermometer at street level reached 108. No immediate promise of relief or of rain was given by the weather observers.

Pol Plancon Very Ill.

Paris, June 27.—Pol Plancon, the opera singer, is dangerously ill. Two or three days ago his life was despaired of, but there has been a slight rally since.

the Athabasca at Smith. The charter of the Canada Canal calls for the completion of that road by the end of this year, and it is stated by the contractors that the grading will be finished by November and the steel will follow close behind.

From Peace River Crossing the plan of the railway is to build on to Dunvegan, on the north bank of the Peace, which will make a great stretch of river country tributary to Peace River Crossing. The fact that E. D. and B. C. interests have joint land on both sides of the river at the Crossing would seem to substantiate this, while others have joint land on both sides. There are several other railways chartered through Peace River Crossing, but the Canada Canal is the only one on which work has as yet actually commenced. However, surveys have been run through for some of the others and it is expected that two of them will start this year—the Canadian Northern and the Pacific, Peace River and Athabasca, a new road promoted by D. A. Thomas, the Welsh coal magnate, and for which it is said money has been already provided.

Several lines of steamers run west on the Peace from the Crossing as far as Hudson Hope, B. C., and north as far as Fort Vermilion, 200 miles to the north, where fine grain and vegetable crops are mature. This trade will also aid in making Peace River Crossing a city.

GOULD'S RECEIPTS GOOD ENOUGH FOR TRUST COMPANY

Inquiry Into Charges Against New Brunswick Cabinet Members is Continued.

LAWYERS CLASH OVER ADMITTING EVIDENCE

Divisional Engineer Asked to Submit Costs of Work Not Yet Completed.

St. John, N.B., June 27.—Inquiry into the charges made against Premier Fleming and Hon. A. H. McLeod, in connection with the St. John and Quebec railway funds was continued yesterday. B. Hal Brown, president of the Prudential Trust company, Montreal, was on the stand during the morning, and he submitted in evidence the account between his company and A. B. Gould and others. The morning was almost completely taken up with arguments by counsel as to the admission of the agreement.

Under the agreement between the Prudential Trust company and Messrs. Gould, Lohan, McDonald and Thompson, of the St. John and Quebec Railway company, payments of the \$350,000 loans were to be made by the trust company to the order of Mr. Gould, whose receipts were to be a sufficient discharge to the company. On Thursday afternoon, after vigorous objection from Mr. Fleming's counsel, the agreement, which Mr. Carvell sought to enter as evidence, was excluded. This was repeated yesterday morning, but eventually the objections were withdrawn and the agreement read. There were several interesting tilts between opposing counsel, the most lively one occurring in the course of a dispute over the admission of evidence relating to the disposition of the actual proceeds of the sale of guaranteed bonds and that the inquiry had nothing to do with the loan, which represented a different transaction. Several agreements between the trust and railway construction companies were also put in evidence.

During the afternoon David Brown, a divisional engineer on the railway, was examined as to the cost of various parts of the railway. He was asked to secure particulars concerning the work yet to be completed and furnish them to the commission at the session on Monday, when the court will sit at Fredericton.

FRATERNAL NEWS AND NOTES

Court Beaver House of the Ancient Order of Foresters meets on the first and third Tuesday of each month in Cameron hall, corner of Griesbach and Namayo, at 8:30 p.m. The juvenile branch of the order also meets in the same hall on the third Tuesday of each month, at 7:30 p.m. There will be a joint picnic of the two lodges of the A.O.F., together with the juvenile branch of the commandery of the Forest at Cooking Lake, on July 1. Everybody is welcome, whether a Forester or not.

Under the joint auspices of the Jewell Rebekah lodge, No. 25, and the Norwood lodge, No. 41, I.O.O.F., a picnic will be held at St. Albert on Wednesday, July 1. Train leaves C.N.R. depot at 9 a.m. Ladies are requested to bring baskets. Tea, milk, etc., will be provided. A good program of sports has been arranged. Particulars may be obtained by telephoning 6094.

On Wednesday, July 1, the delegates selected from all the S. O. F. lodges in Alberta to attend the convention to be held in the city on that date will arrive by the morning train. After the transaction of business, they will be driven round the city in a motor and wind up the day with a banquet at 126 in the hall over the Douglas book store. All members of the Sons of England and their wives and lady friends are invited. The arrangements for the banquet have been left in the hands of the Daughters and Maids of England, north and south side lodges.

All the members of lodge No. 2 are requested to attend the meeting to be held on Monday next, at 8:30, over the Douglas book store.

Jasper Loyal Orange lodge, No. 2484, met on Monday evening in the Odd-fellows' hall, over the Quebec bank. There was a splendid turnout of members for the longest have been left in the hands of the Daughters and Maids of England, north and south side lodges.

Two candidates were initiated and six applications for membership were dealt with and approved. The candidates will be on hand at the next meeting for initiation. Six brethren were elected to the committee.

Brother Dr. J. A. Neff, formerly of Ingersoll, Ontario, but now of this city, was present as a visitor and brought with him a large number of visitors from the Oranians in his old home. Brother Neff complicated the lodge on how the business was conducted.

Brother S. Murphy, W.M., thanked him for his remarks and assured him that the greetings were heartily reciprocated by the members of Jasper lodge.

Brother J. J. Hoey, W.M., I.O.L., No. 2461, informed the members present

of the arrangements for celebrating the battle of the Boyne on the 11th of July at Calgary. Jasper lodge hopes to have the best turnout of any other lodge in Edmonton. Practically all members present expressed their intention of making the trip.

The fortnightly meeting of Norwood I.O.O.F., No. 2461, was held in the Oddfellows' hall, Norwood boulevard on Tuesday last. There was a good turnout of members and visitors. Bro. E. J. Hoey, W.M., was in the chair, with Bro. Clark as deputy. Six brethren were advanced to the Blue and Royal Arch Purple degrees, the work being put on with the assistance of Bro. D. Dobson, W.M., I.O.L., 1794. E. J. Hoey, first lecturer, I.O.L. 2461.

Bro. Hoey acquainted the members with the arrangements for the battle of the Boyne celebration, to be held in Calgary on Saturday, July 11. He urged all members to make the trip, and have a representation in Calgary worthy of the capital city. A number of the brethren took the hint and purchased their tickets there and then. Norwood lodge hopes to be well represented at the demonstration. North Edmonton lodge, No. 2272, West Edmonton lodge, No. 2273, and Jasper lodge, No. 2461, will meet with their Norwood brethren in the hall of the latter on Friday evening, July 10, and parade to the C.P.R. depot. I.O.L. No. 1794 will join them on the way. The Edmonton 16-piece pipers' band will lead the procession, and will go to Calgary with the Orangemen.

Bro. Hoey also asked the members to turn out for the annual church parade on Sunday, July 5, to Westminster church. Rev. Bro. D. N. McLachlan will be the preacher.

I.O.L. No. 1794 will hold a special meeting in Cameron hall, Namayo avenue, on Tuesday evening, the 30th inst., when the R.A.P. degrees will be conferred on a number of candidates. The regular meeting of the lodge will be held on Wednesday, July 1.

L.O.R.A. No. 133 will hold a regular meeting in the Orange hall, south side, on Thursday evening, July 2. There will be a good deal of important business.

I.O.L. No. 2273 will hold a regular meeting in the Presbyterian church, West Edmonton, on Friday evening, July 3.

The degree team of Jewell Rebekah lodge, No. 25, I.O.O.F., exemplified the degree last evening at Maple Leaf Rebekah lodge, in the I.O.O.F. hall, Norwood block.

The third degree was exemplified on Monday last at Namayo lodge, No. 41, I.O.O.F.

Maple Leaf Encampment, No. 10, I.O.O.F., will hold regular session on Monday evening, when it is expected the installation of the new

Cooling Wash Stops That Itch

Yes—not in half an hour—not in ten minutes—but in five seconds.

Just a few drops of that mild, soothing, cooling wash, the D.D.D. Prescription, the famous cure for Eczema, and the itch is gone. Your burning skin is relieved.

G. H. Graydon, Druggist; Thrasher Drug Company, Edmonton.

offerers for the coming term will take place. Encampment members are requested to be present.

The initiatory degree will be conferred on a class of candidates Monday evening next at Namayo lodge, No. 41, I.O.O.F., in their hall, corner of Namayo and Griesbach streets.

Middlesex and Elgin Picnic.

At a committee meeting held at the home of Alex. Stuart, K.C., arrangements were made to hold a union picnic for all old boys and girls of the above-named counties on the afternoon of July 4 at the golf links park. Committees were appointed to arrange a game of baseball between Elgin and Middlesex counties, and also prepare a list of sports, refreshments, etc. All former residents of these counties are asked to accept this as a personal invitation to be present.

SHIP 50,000 POUNDS SASKATCHEWAN WOOL TO BOSTON DEALERS

Regina, June 27.—During the next week or 10 days the co-operative organization branch of the Saskatchewan department of agriculture will ship 50,000 pounds of wool to Eisenmann Bros. of Boston, who have agreed to purchase the consignment at 17¢ cent a pound. The first car of 20,000 pounds leaves on Monday. The agreement merely acts as an acquittance, paying the producers the full price less the cost of marketing.

The wool comes from all parts of the province, but especially large consignments have been received from the Maple Creek district and the Estevan district. Alberta wool growers are also taking advantage of the special facilities and the clip of a large flock of Mohair clip is being sent from Fort Belknap, Alta.

When the Engine Stops

When a motor car, after being cranked, runs for a minute or two and then stops, the first place to look for the cause of the trouble is in the gasoline feed line. A partial stoppage in the pipe will lessen the flow of fuel so that the fuel chamber fills slowly. When started the motor at once consumes this gasoline and then has to wait for more. There is another possible cause for this trouble, and that is the float of the carburetor sticking off course, if the float is stuck in a high position the flow of fuel will be greatly lessened or even stopped.

Ireland now has 4,881,951 people.

YOUNG BOY NEARLY DROWNED BY FLOODS

High Streams From Elm Park Source of Grave Danger to the Youngsters.

SAVED BY COMPANIONS

Warning Issued by City to Parents That Children Desist Playing Therein.

What might have proved a serious drowning accident has just been reported to the safety and health department. A young lad named Luce, accompanied by some companions was playing yesterday in a stream of flood water near 104th street and Woodward avenue, when he fell in. Luckily by the timely intervention of his comrades and quick action they succeeded in rescuing the youth, but he received a very close call.

It appears that this stream of flood water in that part of the city comes from Elm park, caused by the heavy rains.

"On being notified of the existing grave danger and the temptation of school children, in that neighborhood, to play in the stream, Commissioner Booth at once issued warning to all parents. A city policeman was dispatched to caution them. Steps have also been taken by the city to have the depth of the water reduced as fast as possible.

New South Wales in 1913 imported goods valued at \$167,205,515; exports, \$168,829,481.

New Glenora Snap

Will sell, one, two or three lots in NEW GLENORA, south of Athabasca for \$2,300.00 on terms. Builders get busy. These lots face East and cost owner \$3,200.00 per lot.

Apply Box 203, Capital.

ARE YOU AWARE OF THE FACT

THAT Peace River Crossing is going to be the coming city of the Last Great West? All the present indications point to a great future to this wonderful fertile country with Peace River Crossing as the head-quarters and the distributing centre. The surrounding district is also rich in timber, coal, water power, natural gas, oils and minerals, and is only waiting for development. A large amount of capital has already been spent for development purposes. Thousands of first-class settlers and shrewd investors have located in the Peace River district, and 1914 will see many thousands more of eager men who will go and seek their fortunes.

THAT MAIN STREET CENTRE

Is located on the East side of the river, and is absolutely the closest-in property above the Flats. Our property is strictly level and commands an elegant view with perfect drainage. Peace River Crossing will become a great railway centre. The E. D. and B. C. Railway are grading within a few miles of Peace River Crossing and guarantee to be running trains into the Crossing on or before Dec. 31st 1914 and other roads are building and chartered to go there. Besides numerous railway facilities it has nearly 800 miles of navigable waterways.

IS THE BEST BUY IN PEACE RIVER CROSSING

We have the utmost confidence in our property and know all who invest their money in Main Street Centre will reap big returns in a very short time. Peace River Crossing is bound to be built on the high level ground and our property is the choicest.

Opportunity knocks at your door Today and now is the time to buy lots while the prices are right. Investors take notice and act promptly.

Prices from \$200.00 and up per Lot

EDMONTON, ALBERTA

CIRCLE TOUR OF ROCKIES SUPERB VACATION JAUNT

Canadian Pacific's Trains, Steamships and Hotels Offer Luxury Amid
Wildest, Freest Nature, Through Wonderful Mountain,
River and Lake Trip.

One of the most fascinating summer trips that any country on earth can provide, one that takes comparatively little time and is not expensive, one in which magnificent scenery, grand fishing and hunting, a bracing, healthful mountain air and a never-ending panorama of rivers, lakes and mountains greets the eye and soothes the tired and weary brain, and one for which a great corporation—the Canadian Pacific railway—stands sponsor, and has spent millions on railways, steamships and hotels: is the summer circle tour of the Rockies.

The Canadian Pacific has arranged convenient schedules for this trip and offers low fares, which are now in effect, and will be good till the end of September. The low fares are from all points on the system in the west. The route is from Calgary on the main line west to Revelstoke, passing on the way such places as Banff, where are located the famous mineral springs, Revelstoke itself, where the train to the south is made, is a city of great scenic grandeur.

From Revelstoke the tourist goes south, and via the Kootenay and Arrow lakes, through a country which is not only superbly beautiful, but interesting in other ways. Here it was that military came, seeking gold. In the early days of the Crown West Pass railway, now part

of the Canadian Pacific. Here it is that still much of British Columbia's mineral wealth is produced—and mining is the Pacific province's first and foremost industry. Here is where the fruit which captures the highest prices at the world's fairs is grown. And here also, at almost every point, one can take a little side trip to lake, river or mountain, and get even a little closer to nature than one can when traveling on the luxurious trains or boats of the Canadian Pacific, or staying in one of its palatial summer hotels.

After seeing all one has time to see in the far-famed Kootenays, the passenger starts back, via lake and rail, through the Crown West Pass country, where another vista of splendor greets the eye with every bend of the train or turn of the boat. Finally one emerges again into the broad and open prairie, and at Moccasin train north again to Calgary, passing on the route the now famous Okotoks oil fields.

This trip, if one wishes, can be made the other way, that is, by going south from Calgary, west via the Crown West Pass, then north to Revelstoke and east on the main line. Or, as many prefer, the trip may be made to the Pacific Coast—Vancouver, Victoria, Seattle—with little extra charge. Stops of any length can be made at any point, so long as the return journey is made by September 1.

LORD BRASSEY AND KAISER LAUGH AT ARREST OF FORMER

Kiel, Germany, June 27.—The Kaiser laughed heartily yesterday on hearing of the arrest of Lord Brassey, the British naval authority, Thursday night, on a charge of espionage.

The emperor's hilarity was provoked by the inequity of an ardent advocate of an Anglo-German alliance, incurring the suspicions of the German police, but he subsequently conveyed an expression of his annoyance to those who were responsible for the blunder.

Lord Brassey was the dinner guest of the Kaiser on board the imperial yacht Hohenzollern last night and doubtless received a graceful apology for the mistake. Lord Brassey treats his arrest as a joke. He was a prisoner only for a few minutes.

Farwell to J. W. Ward.
A public farewell to J. W. Ward, retiring general secretary of the Edmonton Y.M.C.A., will be given in the education building on Tuesday evening, June 30. Mr. Ward leaves shortly to take up his new duties at Hamilton, Ontario.

EDMONTON'S SCHOOL TEACHERS COMMENCE SUMMER'S VACATION

All public schools in the city are closed today, as the commencement of the summer holidays, and as a result a great amount of work is on the hands of the school board office, who have to charge the paying of two hundred teachers and supervisors, as well as thirty-one caretakers. Arrangements are also being made for the reading of the examination papers. The teaching staff of the city includes seven teachers in the technical, thirteen supervisors and assistants in public schools, six kindergarten teachers and assistants, and a number of high school teachers and assistants, and the remainder of the staff public school teachers. The summer vacation of the largest teaching staff in Canada. Schools will re-open Monday, August 31.

Still Seeking Philanthropist.
Commissioner Booth and the secretary of the United Aids, 312 Taylor building, are still waiting to hear from the man who inquired recently of Commissioner Booth in regard to endorsing a charity of Edmonton. They would be glad to hear from him again.

EDUCATOR SEES THE VALUE IN THE THREE R'S

Philadelphia, June 27.—Dr. Alexander Johnson of the Training School of Vineland, N.J., shattered some of the soundest principles of pedagogy and paragonism when he talked to the special class teachers of Philadelphia.

Dr. Johnson said the country has many serious problems that will only be solved by decent citizenship. In order to have decent citizens, he said, it is necessary to give children proper education. He then assailed the theory that reading, writing and arithmetic are the basis of primary education, and the theory that all men are created equal.

"People say that cooking, sewing and all vocational training are but frills of education, but we know that reading, writing and arithmetic are the frills. We want to stop teaching the three R's and teach children."

"In the future there will be no schools but outdoor schools. That is an atmospheric remedy that must come. When we have our children surrounded by the proper light and air we can work on their brains with better effect."

"The idea that all men are created equal is the greatest American folly. Our task for the future is to learn to pick out the child that was born to be a criminal and check it before it commits a crime. We must find the children who have mental defects, analyze their individual defects and correct them."

"In educating children, the child who is usually weak ought never to be in a class made up of children who are capable of handling the lessons prescribed for them. We must be able to immediately recognize the child whose mental progress is checked and give him the lessons he can master."

"The time is coming when he will have practical experience. While we cannot say who shall marry, we can say who shall not marry."

Dr. Johnson said that the mine war in Colorado is ten times as important and serious a question for the United States to settle as the Mexican situation.

FARMER IS DECEIVED BY STRANGE WIFE

Kansas City, Mo., June 27.—The spring of 1914 gave a romantic turn to the mind of J. A. Kralchak of Clayville, Mo. Also he had the money to indulge it.

So he answered a matrimonial ad and "Miss Katherine Taylor, Federal Hotel, Kansas City," answered his letter. She wanted to get married if she could find a man to suit her. Kralchak also wanted to get married, and after two weeks of correspondence he arranged to come here and visit Miss Taylor.

Kralchak arrived a week ago and went to the federal building to meet Miss Taylor. She was there—blue shirt, white waist, dark hair and the two gold teeth—just as her letter had described.

The couple proceeded to get acquainted. Soon night came and Miss Taylor had to go home. Kralchak volunteered to see her there. She said it would spoil the game. The sister, she said, was opposed to her getting married.

So Kralchak was content to see her board a car after she promised to meet him at the same place the following day. He rented a room at the Harvey house, 315 East Twelfth str. and prepared to stay in Kansas City a while.

The next day Miss Taylor came. The meetings continued from day to day, and as soon as propriety would allow they began discussing matrimony.

She had valuable city property, she said. He had money—real cash in the bank.

ALBERTA POURS OIL

ON TROUBLED WATERS OF FINANCE

**BUY OIL SHARES
IN A SOLID, WELL-CONDUCTED COMPANY**

**LONDON
UNION OILS
LIMITED**

\$1 par value

Fiscal Agents:
MCCUTCHEON BROS., LIMITED

THE financial situation, because of the oil situation, is looking brighter—judging from the remarkable reception given London Union Oils, Limited, on its first appearance on the market. Orders for stock have literally poured in, until it now appears as if the stock might be withdrawn from the market in the very near future. The people have confidence in London Union Oils, Limited, because we have made it a company worthy of confidence. This company is anxious to get its gain from OIL—not from shareholders' pockets; and to this end arrangements will be made to drill three wells in the Monarch district, on sites selected by B. W. Dunn, the company's geologist—the man who chose the site for the now famous Monarch well that produced crude oil.

CAPITALIZATION is reasonable—\$500,000, of which the first stock issue, \$200,000, (less commissions and running expenses) will be used for development. Directors and leaseholders' stock remains in trust in the Bank of British North America until oil is struck; and then the strike of oil must be testified to by the company's geologist. What could be fairer? How could we better show our confidence in the company and the Monarch Oil district? How could we give you a better show for your money?

We do not profit until you profit—when oil is struck. WE WANT YOU to realize that oil in any new field is a venture; but indications here are so good—gasoline in the Dingham and crude oil in the Monarch—that we sincerely believe that this oil venture will be a successful one. This belief is held by our directors, prominent, conscientious men, who cannot afford to associate their names with a failure, or with a company that does not consider the interests of the shareholders.

We wish to sell you stock—but only on the understanding that you enter this oil venture with us—equal chances for success—and share with us the financial success that may come. We don't want one dollar from anyone who cannot afford it. We are earnestly after oil, on a business basis—and on this understanding we invite you to join us as a shareholder; but, if you are going to take stock, better get it now, for sales are growing daily, and we don't know what day the stock will be taken off the market. Call, write or mail the coupon with your remittance today.

While we want all the stock subscriptions it is possible to obtain, yet we do not want anyone to buy our stock with the idea that they are investing in a certainty. Oil in any new field is not a certainty. The strike of crude oil in the Monarch strengthens our confidence in our holdings. We have a good, solid company to develop the holdings, and an eminent geologist to select the sites for drilling. We have confidence in our proposition, and furthermore our Directors do not make money until you do—when oil is discovered.

It is only in this fair and distinct understanding that we offer our stock for sale; we want the money of nobody who cannot afford a venture—but all indications lead us to believe that it is a venture with excellent prospects of success.

Write this very day for the Schilling Rupture Lock. It is a wonderful new device that the thousands of rupture sufferers have been waiting for. It is a wonderful new device that the thousands of rupture sufferers have been waiting for.

NEWS OF THE CHURCHES

In order to satisfy, as far as possible, the numerous enquiries that are being constantly made regarding the doctrines taught by Pastor Russell, the Edmonton branch of the International Bible Students' association has arranged for a public lecture to be held at 8 o'clock tomorrow evening at the Empire auditorium, 102nd street. All are invited to attend this interesting discourse, which will be given by J. B. Williams, whose ability to expound the scriptures is well known to many Edmonton people.

It is estimated that about 50,000 of the total population of this city do not attend any religious service whatever, the association, therefore, gladly extends the invitation to these particularly. No collection will be taken. All seats are free.

The pastor of Carmichael Methodist church, F. J. Johnson, B.C., D.D., will occupy the pulpit tomorrow both morning and evening. The morning subject will be "The Bright Light," and in the evening, "Doing Our Best: Its Effect on Life." Sunday school at 3 p.m., when the pastor will teach the adult Bible class.

At Calder Methodist church, West Edmonton, Rev. E. H. Winfield, the pastor, will preach tomorrow evening at 7:30. Sunday school services will be held at 3 p.m.

Rev. H. C. Griffith, B.A., will occupy the pulpit tomorrow at both morning and evening services in connection with the Welsh church, which meets in McKay avenue school. Mr. Griffith formally established the church last November, his ministry during the few weeks of his visit resulting in a substantial and beneficial growth. He has established several Welsh churches in all the Welsh districts during the past 12 months. All Welsh citizens should make an effort to hear him. The evening quartette will sing during the layman's service.

At the First Baptist church tomorrow Rev. F. W. Patterson will give the first series of addresses on "Practical Problems of Young People." Subject, "Sailing Without a Rudder." The morning subject will be "The Debt of the City to the Farm."

The services in McDougall Methodist church tomorrow will be conducted by Rev. W. E. McEwen, B.A. Morning subject, "The Unrecognized Christ," evening subject, "Judas Iscariot." In the morning the choir will render "There is a Green Hill," by Sumner, and in the evening they will sing, "Blessed be the God and Father," by Wesley, and "He That Dwelleth," by Jeffers. In the morning Mrs. McEwen will contribute a solo.

At the Unitarian church 102nd and Jasper, the pastor, Rev. C. F. Potter will preach tomorrow morning on "The Modern Ten Commandments." At the Forum, at eight o'clock, Prof. W. H. Alexander will speak on "Religious Teaching in the Public Schools." This

is the last meeting of the Forum until September, but Mr. Potter will speak at the same time and place on July evenings, upon contemporary sociological problems.

The Gaelic speaking people of Edmonton will be interested to hear that the building of the Gaelic Presbyterian church near Spruce avenue is succeeding rapidly and it is expected that the edifice will be ready for the formal opening about the middle of July. The services which have been held will be discontinued after tomorrow, and due notice as to their continuation and the formal opening of the new church will be given later.

In Grace Methodist church tomorrow will hold an open session at 3 o'clock. The subject, "Making a Record." A number of children will be baptized after the service. In the evening the subject will be: "Is Christianity a Benefit to the World?"

Grace Methodist church Sunday school will hold an open session at 3 o'clock tomorrow. Rev. D. N. McLachlan, of Westminster church, will address the adult Bible class. D. M. Hunter, Rev. Thomas Powell, and the superintendent, will take charge of the intermediate department; and the primary staff will have charge of that department. Mr. Howard Stutchbury will sing.

"The Manhood of the Master" will be the subject of a series of discussions to be begun at the Brotherhood meeting at the First Baptist church tomorrow at 2 p.m. Prof. Sheldon will read and the consideration of the first characteristic, "His Joy." The talk last Sunday by Mr. Bury on "The Character of Christ," was a splendid introduction to the study of this interesting series.

The subject of the lecture at tomorrow's meeting of the New Thought Temple will be "The New Alignment of Life." The lecturer will be Rev. C. F. Potter, minister of the First Unitarian church.

The pulpit of Robertson Presbyterian church will be occupied on Sunday morning by Rev. D. N. McLachlan, of Westminster church, and in the evening by Mr. Monteth, whose topic will be "The Joy of Calvary."

St. John the Evangelist Mission, Allendale Sunday school, 3 p.m.; evening, 7 p.m. Rev. R. B. Burgess, incumbent.

At the First Presbyterian church tomorrow Prof. J. M. Millar will speak on "The Modern Ten Commandments," at 11 a.m. At 7:30 p.m. Dr. C. A. McLean, Ph.D. will conduct the service on the subject to be "From Moral Shock."

SCULPTRESS, VEILED, CARVES HER FAREWELL

Aloft on Scaffold in St. Louis Cathedral, Miss Wilson Completes "Last" Farewell.

St. Louis, June 27.—Standing on high a scaffold in the transept of the new Catholic Cathedral with a novice's veil about her face, Miss Melva Beatrice Wilson of New York, famous sculptress, is carving her life's masterpiece as her farewell to the world.

When she sees the work finished and the seven stations of the cross stand out in white relief in the marble beneath her hands she will renounce ambition to become a nun and enter upon a life secluded.

The renunciation will mean to her as much probably as to any woman of America who has written her name in the realm of art or letters. Besides occupying a distinguished place as a sculptress, she is a member of the National Arts Club, the Municipal Arts Club, the Woman's Press Club of New York City, and other bodies, the roster of which includes persons of note. She is the author of several poems and articles on various subjects.

The heroic figure of Christ in Washington is one of her best works, and others are "The Volunteer," "The Visitation of St. Cecilia," "The Bull and the Bear."

"The Minute Man" in the Corcoran gallery in Washington is another of her notable pieces of statuary.

She is a devout Catholic. When she was awarded the contract for the carving of the Cathedral frieze, she determined upon a long period of extended study of the history of Christ.

She announced that she would devote the remainder of her life toward enabling herself to incorporate in stone the tremendous incidents of the Saviour's career in such a manner as to convey to the observer something of the feeling she tried to put into it.

She studied here and abroad, especially in religious edifices, from written words and carved stone. Now, as she works on her scaffold, veiled and devout, she has a vase of Calla lilies at her feet and surrounds herself as much as possible with material aids to concentration of mind upon the vast subject.

Monday evening next the Epworth league of Grace Methodist church will in charge of the temperance committee. A special address on "What the temperance costs Canada" will be given by Rev. Thomas Powell and a fine program of vocal and instrumental selections is being prepared. The Sunday school orchestra will be in attendance.

CITY'S HINTERLAND SETTING FOR NEW WORK OF FICTION

Stanley Washburn Gives World "Two in the Wilderness," Western Narrative.

REMARKABLE STORY OF PRESENT G.T.P. TRAIL Probably Will Give Reader Newer and Better Views of Life.

Probably there are few Edmontonians who know that the country now being opened up by the main line of the Grand Trunk Pacific has already provided the setting for a most remarkable piece of fiction which, however, one can hardly believe is fiction as one, particularly one who knows the western wilds, reads it through.

The author is Stanley Washburn and the title he has chosen for his work is "Two in the Wilderness." The following extract from the preface is interesting: "The country in which this simple narrative is set is that vast new empire of Canada lying in eastern British Columbia and western Alberta that is just now being opened up by the new line of the Grand Trunk Pacific railway. It is in its last gap between the Atlantic and Pacific oceans is piercing a thousand miles of hither to all but impassable wilderness."

Travelers who go west on the Grand Trunk Pacific can, if they wish, see many of the places mentioned in the story, some from the trains. Such places as the present town of Jasper, formerly a favorite camping place of the hero in the narrative, Tete Jaune Cache, the Yellowhead pass and other now famous spots on that wonderful trail, which has been turned into one of steel by the G.T.P., are mentioned—but not by their present names.

"Smith," the son of a prominent and well-to-do parent, finds himself, after seven years of mountain life, during which time he has been away from what is known as civilization, suddenly wealthy in his own right, through the discovery of a rich gold ledge in some part of the central B. C. mountains. He starts for the east and home "up river," that is, up the Fraser, but after only part of one day's travel, the most remarkable incident, or series of incidents, that he has so far encountered, even during his seven years in the wilderness, begins to happen.

There is, of course, a woman in the story, but the nature of the woman and of the man are shown so differently than in other books that the lover or student of human nature should not miss reading it.

The author seems to know the very innermost thoughts of his subjects, and portrays their feelings and characters in a most minute and detailed way—a way that makes the reader feel that something new is told in every line, although the words must simply show that the reader himself has felt or is feeling the same indescribable, mysterious, wonderful, but just human, emotions.

There is philosophy told in a new way in this distinctively western Canadian work. It pictures the great gulf that lies between the conventional life of the great modern cities and the real, natural life one meets where no automobiles, no street cars, no smoke issuing from hundreds of factories, mar the pelucid air of the mountains or bedevil their horizon against the sky. It proves, without apparently trying to prove, which life one who, would be free to take either, would choose.

One of the most delightful and really beautiful passages is where the author sort of ties those two very mysterious things, love and astronomy, together and very cleverly leads the reader into a most pleasing view of the little troubles which are always seemingly disturbing the would-be placid surface of everyone's life. Although this sentiment is not approached, the reading of the hero's description of his "objects" in life and his unconscious tribute to woman, cannot fail but to move those who read, even those perhaps, whose thinking is confined to the surface of things.

To tell the story in a few words would be impossible. To tell how it ended up—now the author leaves the reader—would be worse than useless. All that can be done is to ask those who have a little warm spot in the corners of their hearts for the romance this glorious and last great west, or for humanity, or for philosophy told in a new way, or for reading it itself, to read "Two in the Wilderness." It may give them a newer and better knowledge of life and the things round about them. It is published by the Copp, Clark company, Toronto.

There are 7,000,000 peons in Mexico.

Brooklyn, N.Y., has completed a new sea wall in Bay Ridge section.

Prince of Wales has taken up pipe-smoking.

Frederick Charles, laborer, of Glenwood City, Wis., has fallen heir to \$70,000.

CANADIAN AMERICAN CLUB BIG BASKET PICNIC

To be held at Lake Wabamun, near Town of Wabamun on next Saturday, July 4th. All Americans whether Club Members or not and their friends and all Canadian friends of Americans are cordially invited to attend this Grand, Big, Good Time.

We are to have a special train leaving G. T. P. depot at 8:45 and returning 6:45. Special reduced fare return trip \$1.00 and children 50c.

We expect a crowd of 500 people and there will be dancing, foot racing, ball game, and boating.

Do not forget the date—July 4th!

You may bring your own basket or get a fish dinner at Wabamun at a reasonable price.

CONFIDENCE IN FUTURE BECOMING MORE PRONOUNCED

Dun's Reports Say Prospects Rosy, Though Conservatism Still Prevails.

TRADE HOLDING NORMAL THROUGHOUT ALL WEST

Vancouver and Coast Quiet, But Steady—Not as Active as Looked For.

New York, June 27.—Despatches from Dun's Review from branch office of it. G. Dun and company in leading trade centres of the Dominion of Canada indicate that conservatism is still a prominent feature, but that with the crops making satisfactory progress, confidence in the future is becoming more pronounced.

Montreal reports little change in conditions, which is natural at this period but while wholesale trade in dry goods is quiet, retail dealings have shown more activity. Groceries are moving in fair volume and more orders are being received for lead, but the iron market is still dull and most industrial developments are not very active.

Retailers at Quebec report an increase in sales but wholesalers note little change and the industrial situation is still quiet.

Some improvement has appeared in wholesale trade at Toronto, but merchants are cautious and their orders are mostly confined to immediate requirements. Such satisfaction is expressed regarding the favorable crop prospects which if continued are expected to result in a very active fall and winter business.

Hamilton reports retail trade to be normal, but there is little change in wholesale lines and most factories are working only part time.

Conditions in the far west and north-

west seem to be about the same as heretofore reported, business being about of normal volume and prospects encouraging owing to the splendid outlook for the crops.

Business at Winnipeg is fairly well maintained, there being fully an average amount of sales in nearly all staple lines, while if present crop expectations be realized, merchandise say that fall trade will be active.

There is some call for summer merchandise at Regina but no particular activity.

Calgary reports a brisk demand for staples such as groceries, provisions, etc., and a normal movement in most other leading lines.

Steady demand for groceries is reported at Saskatoon, but sales of dry goods and shoes are hardly up to expectations.

Vancouver reports country business rather quiet, though steady but city trade not as active as expected.

Gross earnings of Canadian railroads reporting to date for two weeks of June show a decrease of 15.4 per cent, as compared with the earnings of the same roads for the corresponding period a year ago.

Commercial failures in the Dominion of Canada this week numbered 31 against 52 last week and 27 the same week last year.

MUCH INTEREST IN CANADIAN BANKING FIGURES FOR MAY

Ottawa, June 27.—The May bank statement, out yesterday, contains several features of interest, liabilities being reduced by deposits of \$10,599,000, and assets by nearly \$12,000,000.

There is a decrease of \$10,000,000 in demand deposits and an increase of the same amount in notice deposits. Deposits elsewhere than in Canada are down about \$18,000,000.

Call loans show a falling off of \$10,000,000 outside Canada, and of over \$1,000,000 in Canada. Current loans in Canada increased \$2,000,000, and elsewhere there was a decline of about \$2,000,000.

Note circulation is up more than \$2,000,000, and there is a decline of nearly \$2,000,000 in Dominion notes. Deposits in central gold reserve increased by \$300,000.

Archibald, Pa. is motorizing its fire department.

CIGAR COMPANY TO OCCUPY NEW QUARTERS SOON

Shaw's Factory and Warehouse is Model of Modern Factory Construction.

MONUMENT TO FAITH OF THE EARLY DAYS

Product Sold From St. Lawrence to Pacific—Making New Brand.

To the untold progress made in recent years in the science of building is marvelous. During the last decade or so, almost every year has brought forth some new feature in the construction of office buildings, residences and factories, until the well-nigh perfect building of today is a thing altogether apart from that of even a comparatively few years ago.

The clear factory now being built for Harry Shaw, maker of the La Palma and Major Reno cigars, is an outstanding instance of this difference. It is embodied all the latest features that money can buy or science devise. It is being built in this way with a two-fold object in view—first, that the very best cigar can be made, (since that will please to the utmost the most fastidious smokers); and second, so that the employees of the institution will work under the most favorable conditions possible.

The new factory is located on Fifth street (16510) on the east side, the rear being on the Canadian Northern spur track between Fourth and Fifth streets. It has four storeys and a basement, is of Kahn reinforced concrete construction, with dark red tapestry brick front and stone trimmings. A new feature is the hollow walls, which are said to keep the building cooler in the summer and warmer in the winter than would otherwise be the case.

The H. V. Shaw cigar company's main office will be on the ground floor, while the workroom and store rooms will be on the top. Part of the basement will be used as a bond room, as most of the material used in the manufacture of cigars is imported from southern countries and pays heavy customs duties. The other two floors will be used for warehouse purposes.

The top floor, or the workshop, is perhaps the most interesting portion of the building. The floors throughout the building are of Master Builders' cement, except two rooms on the fourth floor, which have asphalt floors, which is more restful for the feet of those employees who have to stand up than almost any other floor known.

The whole roof is virtually one great light and there are also large windows in the front. Besides being more beautiful to employees and not hard on their eyes, it is necessary to have lots of light to make good cigars. The colors of the different kinds of tobacco must be distinguished and experienced cigar makers can detect differences where the lay man would say there were none.

There are two freight elevators in

the center of the back of the building, with doors to the loading platform on the C.N.R. spur and also on the opposite side, leading into the building.

The workroom has a fan ventilating system and is arranged according to the latest scientific principles, so that one set of workmen need not interfere with another. It has improved machinery and processes for the drying of cigars and keeping them at the right temperature and humidity till the very minute they leave the factory.

The building will cost about \$50,000. Carter, Hells and Aldinger are the contractors, and Magnus and MacDonald the architects. The former were the architects for the concrete work on the high level bridge over the Saskatchewan here. It will be occupied by the company, which is now located south of Jasper on Second street, about September 15.

Mr. Shaw began to make cigars in Edmonton 14 years ago, when a sawmill stood on the site of the Empire hotel, opposite his present factory. At present about 20 people are employed, and when the new factory is opened in the early fall, there will be about 100. At the new building there is a large enough capacity for 250 men.

SUMMER TRAVELERS LEAVE EDMONTON FOR RESORTS IN COUNTRY

The Edmonton schools have closed for the summer vacation and the railway ticket offices report a general temporary desertion of the city by school teachers, many of whom are taking advantage of the low eastern excursion fares and will holiday around the great lakes. Others are taking the circle-tour-of-the-Rockies trip, or going to the Pacific coast via the Canadian Pacific. The railways, in fact, are enjoying a very gratifying summer resort and tourist traffic trade in every direction from Edmonton. Despite the weather, which has been so far anything but the kind which would induce people to get away from asphalt pavements and out to the beaches. Many have already gone to Gull lake, near Lacomb, most of them to spend two or three weeks or months, while Lake Wabamun has a larger number of visitors than ever before at this time of the year.

The Canadian Northern is also about to get into the summer resort carrying business and announces that a Saturday afternoon train will be run during July and August to St. Albert and Morinville, for the accommodation of canoe club members and others who like to spend the week end at these places. On Dominion day the C.N.R. will run a special canoe club excursion to St. Albert.

Go To Gull Lake.
F. T. Fisher, secretary of the Edmonton board of trade, left this morning for Gull lake, with Mrs. Fisher and family, who will spend the summer there, while Mr. Fisher will return in a few days and resume his duties of picking the board of trade through its sorrows and gladness.

Brooklyn's Flatbush subway will be 87 feet below Park plaza.

HOLDS THAT THIRD OFFICER, STORSTAD, WAS RESPONSIBLE

Unauthorized Took Collier's Wheel From Helmsman and Put Hard-a-Port.

VESSEL AT THE TIME UNDER STEERING WAY

If No Change Made Ships Would Have Passed Safely, Says C.P.R. Counsel.

Quebec, June 27.—Because her wheel was first put to port and then, without the authority of the officer in charge, put hard astern when she had steering way, Butler Aspinall, K.C., in the course of his address to the Empress of Ireland wreck commission yesterday afternoon, contended that the Storstad was responsible for the disaster on May 25.—Mr. Aspinall asked the commission to find that the crew of the Storstad were inaccurate when they claimed the collier did not answer her helm and reasoned that the change in the course of the vessel on the ported helm took her into the side of the stationary liner at right angles and at sufficient speed to cause the wound from which the Empress sank. If no such change had taken place, he argued, the two ships could have passed safely.

Mr. Aspinall further argued that to find that the Empress starboarded her helm, as assumed by the Storstad—would be to cause injury to Captain Kendall, who had claimed no alteration took place in the heading of his ship, and that she was stopped like a log in the water, as indicated by the signals heard on the collier. In the course of his address, which occupied three hours, only while scoffing at the idea of Captain Kendall telling a deliberate lie when he had only recently faced death, did Mr. Aspinall become at all dramatic. For the rest he was calmly and coolly argumentative, relieving the tedium of such an extended effort on the crowded court room by touches of humorous or cutting sarcasm.

The crowd broke into a laugh when he described the unanimity with which the Storstad's officers recalled that they had ascertained the vessel's heading was not altered by the porting or hard-a-porting the helm as a "remarkable affection for the compass under most unusual circumstances."

The first suggestion of personal responsibility for the disaster during the hearing of the commission was made by Mr. Aspinall when he held that Third Officer Saxé, who unauthorized had taken the collier's wheel from the helmsman and put it hard-a-port was "the culprit in the case." Saxé's argument that his action did not affect the ship, he claimed, was an "attempt to clear himself with his Norwegian clientele."

Chief Justice MacLeod, who has been acting on the commission with Lord

Mersey and Sir Adolphe Rouhier, will leave for the Canadian and British sessions on Sunday night for Montreal, and will on Monday make an examination of the damaged bows of the Storstad.

POLICE COURT

D. Federof, who keeps a boarding and rooming house on Isabella street, near the C.N.R. station, was this morning charged in the police court with having sold liquor without a license. He was convicted and fined \$100 and costs.

The drunks this morning were divided into three classes. The 41 ones were Joseph Herck and Kost Monet; Wm. Russell was taxed \$1 and costs; Wm. Scruvville, John Wierke and J. W. Crossweller were given suspended sentences, and J. T. Pettit for excessive drinking was interned for two years.

Joe Smith picked a gun, but was given suspended sentence. Geo. Forsy, keeper of the Dundee rooming house, who was heavily fined the other day, will appear Tuesday on the charge of attempted bribe of a police officer.

Summer Excursion Starts July 3.

Many interested persons have made inquiry concerning the special accommodation being secured by the Western Ontario Association of Edmonton for persons taking a summer tour to Ontario, Quebec and Canadian points further east. The date of departure from Edmonton has been fixed for Friday evening, July 3rd, via G.T.P., making the best possible connections at Port Arthur for the boat trip to Sarnia. Persons who wish to join this party should make reservations early as the summer rush in getting under way and boat accommodation especially should be secured in ample time. Tickets are good for 60 days or longer if necessary. Full particulars may be secured from the city tourist agent, G.T.P. Jasper east, Edmonton.

Philadelphia is moving to correct housing evils.

Wilkesbarre, Pa., has over 400 municipal employees.

BUILDING PERMITS MORE THAN DOUBLE SAME WEEK 1913

Statistics for Week Closing June 27 Show Decided Favorable Increase.

LARGEST TAKEN OUT NEW HIGHLANDS SCHOOL

Building to Cost \$135,000—Greater Than Last Year But Less in Number.

Building permits for the week ending June 27 more than doubled those of last year for the corresponding period. This year shows a total of \$27,700 against \$9,100 for 1913. Last year 60 permits were taken out, while this year's statistics are only 46 for the same time, although totalling much in excess.

Among the permits taken out for the week just closed the largest is that for the erection of the new Highlands school, the amount of which is \$135,000. This was taken out yesterday by Messrs. Reid, McDonald & Brewster, Limited, who are the contractors. Permits for two residences to cost \$4,000 each were also taken out by F. C. Smith, to be built on 12th street. Other permits just issued at the building inspector's office are:

A. Baron, 91st street, stable... \$200
W. Hamilton, 16th ave. dwelling... 200
A. Kluka, 14th street, stable... 500
The total permits so far this year up to the present time reach the aggregate sum of \$3,627,947, and total 1165 in number.

Boys Relay Team.

All members of the Y.M.C.A. boys' relay team who wish to try out for the relay team are requested to be at the south side athletic grounds on Monday evening at 7 o'clock. The following are specially requested to be present: Jones, East, Swales, Talbot, Taylor, Lyons and Parney.

A TRIP TO PANAMA

THE CAPITAL wants every one of its readers to take a trip to the GREAT PANAMA CANAL and see the wonders of this mighty achievement. You say you can't spare the time. All right, then we'll bring the Canal TO YOU—all in one BIG volume, filled with PICTURES of ACTUAL SCENES never before published, described in words that hold you spellbound. Read on, and learn how you may get this magnificent book—this complete story of Panama in picture and prose—

FOR \$1.20 ONLY

Not merely a picture book, but an educational work of rare interest to every member of the home.

Art plates reproduced from water-color studies abound throughout the entire magnificent volume.

Every progressive man, woman and child is eager to know all about the Panama Canal and the remarkable country through which it passes. Realizing this fact several hundred newspapers have arranged to take an enormous advance edition of the most elaborate and complete illustrated history of PANAMA AND THE CANAL, published by the Syndicate Publishing Co., of New York City.

This company is eminently fitted to issue such a work at a minimum cost. It has heretofore supplied through daily newspapers millions of high-class fiction and other books.

THE CAPITAL is the one paper in this section through which PANAMA AND THE CANAL IN PICTURE AND PROSE can be had. The plan outlined below tells you how to get this only complete Panama Book ALMOST FREE.

The large volume is twice the size of an ordinary novel; it is a most handsome book, stamped in gold, with beautiful color panel on front cover, showing the famous Culebra Cut; it contains 450 large pages filled with interesting information of rare educational value to every reader. The illustrations are modern works of art, covering every important scene in the Canal Zone; they include 16 water-color plates with more than 600 photographic studies.

Presentation By The EDMONTON CAPITAL

Willis J. Abbot, the versatile writer on international subjects and author of many books of history and travel, spent months in Panama and the Canal Zone in the preparation of this volume. He collected at first hands the complete history of the great Canal, with a wealth of historical data concerning Panama which has never before been written. The result is a human interest story of this beautiful land and its people from the early days when Columbus tried to find a natural waterway from the Atlantic to the Pacific, down to the present time.

Special staff photographers made the hundreds of beautiful views which illustrate practically every page of this exhaustive book.

The well-known artist, E. J. Read, made the sixteen sumptuous water-color studies which are reproduced by the latest color processes on specially made paper.

The Panama Canal, the greatest engineering achievement of the world's history, cost more than

\$400,000,000

It links the two greatest oceans, and becomes the most important factor in peace and war. So where is the red-blooded inhabitant of this globe that does not feel vitally interested in it? Truly it is the wonder of this progressive age!

ELIMINATE JOY RIDING IN CITY AUTOS SUGGESTED

South Side Ratepayers Meet to Discuss Municipal Problems of Day.

THINK NEW TELEPHONE RATES ARE REASONABLE

Allocation of Cost of Paving Between Street Railway Tracks Considered.

An active interest is being taken by the Edmonton Property Owners Association in the proposed election of a commission form of charter and a committee of 15 members has been appointed to go into the matter. Correspondence has been carried on with other cities having elective commission government and also with prominent men who have been associated with municipal government in such cities.

A meeting of the south side ratepayers under the auspices of this association was held in the Conservative club room Friday evening at which a number of addresses were given on the local municipal situation. J. J. Duncan, a former mayor of Strathcona, presided.

Municipal Garage.
R. S. McKenney, secretary of the association, in the course of his remarks outlined the work the association was endeavouring to do. One of the suggestions he made was that there should be a municipal garage and that automobiles should be checked out to those who were entitled to use them. In this way he claimed that joy riding and Sunday use of automobiles would be eliminated to a greater extent. He stated that there were now 18 automobiles in use in the city departments and that he represented ten different makes. He thought a standard make should be adopted for use as being more economical.

While individual salaries paid to city

officials were not too high, he considered that the percentage of tax receipts paid in salaries was too great, amounting to about 10 per cent of the taxes.

Street Railway Paving.
Regarding the charging of the cost of paving between the street railway tracks to property owners, he said the association had written to the commissioners protesting against this, as they considered that the street railway should be made to pay from the patronage it received and that the taxpayer should not be called upon to pay more to assist the system than was paid to other cities. He expressed the view that the present superintendent of the system was a good man and should be backed up.

The association considered the proposed increase in telephone rates reasonable in view of the facilities received. The stockyard, he thought, could be more satisfactorily handled by a private company than he would feel inclined to allow the railroads and parking houses to handle the business, as he considered the margin too small to warrant it being undertaken as a municipal proposition.

The address was also given by ex-Alderman Walsh, O. Bush, J. H. Macdonald, and J. H. Skeneff.

It was decided to hold a meeting on the south side every two weeks.

E. W. Cox Is Dead

Toronto, Ont., June 27.—A cable message received by the Canada Life Assurance company today, announced the death of E. W. Cox, president of the company at Folkestone, England.

The news came as a great surprise to all of Mr. Cox's business associates. It was only last Tuesday that he himself sent a reassuring message to the company's office.

The cause of death is given as a hemorrhage following treatment he was undergoing for throat affection.

Salem Flood Swelling.

Salem, Mass., June 27.—Measures for the relief of the 18,000 persons made homeless in yesterday's catastrophe are proceeding with military precision tonight. More than 5,000 were directly dependent upon the relief committee for shelter, while 4,000 waited patiently in the various bread lines for the food which streamed into the city in abundance.

New Rifle Clubs.

Ottawa, June 27.—Militia orders issued yesterday authorize the foundation of the following rifle associations in western Canada:

"C Squadron Thirtieth Horse, Enderby, B.C.; Fifteenth Regiment Highlanders, Victoria, B.C.; No. 663 Wapinitia, of Wapinitia, Man.; No. 663 Sprindale, Didsbury, Alta.; No. 663 Montclair, at Montclair, Man."

Good Butter Recd.

Ottawa, June 27.—Of 346 samples of butter collected throughout Canada during November, December and January last, the Dominion analyst finds that 316 were genuine, 13 practically samples collected in the province of Quebec, and six adulterated. Of the 316, five were found to be genuine for sale were found to be genuine.

Two Hundred Perished

Batavia, June 27.—Latest reports received today that at least 200 perished in the earthquake in southern Sumatra yesterday, 20 are known to have been killed in the Benkulen district, the only region in which communication is restored.

Valuable Art Discovery.

Stockholm, June 27.—Dutch art experts have discovered in the national museum gallery here two Rembrandts—"A Portrait of a Woman," and "Abraham's Sacrifice," both pictures being said to belong to the master's early period.

Good Outlook Better.

St. John, Nfld., June 27.—More favorable reports regarding the cod fishery are being received here and the prospects look better.

The Dominion royal commission, expected here July 16, being transferred at Rimouski from the Atlantic to the Canadian government steamer Earl Grey, which conveys them to St. John.

London Man Drowned.

London, Ont., June 27.—A body taken from the Detroit river Sunday afternoon has been identified as that of Herbert C. Green, aged 26, of this city, grandson of H. C. Green, coal and wood merchant of London.

Heavy Fire at Turst.

Hitchcock, Ont., June 27.—The Koehler House, a frame hotel; James O'Brien's cabinet shop, Lawrence Ross' general store and a number of barns and other buildings in the village of Turst were destroyed by fire of unknown origin early yesterday morning. Hitchcock and Ridgeway were appealed to for help.

Mexican Smelter Starts.

New York, June 27.—The American Smelting and Refining company, it became known here yesterday, has decided to resume its operations at its Chihuahua, Mex., smelter. The company's employees have been ordered to proceed to Chihuahua and it is expected that by July 1st the plant will be in full operation.

The Dolly Varden In Straws of Every Hue

Straw of every known kind is pressed into service for hats of Dolly Varden shape, with large bands of ribbon loops or flowers and the note of the moment in such models is the statement of motifs which fall gracefully down the back of the wearer to below the waist.

These Dolly Varden hats are in straws of every hue, some of the most becoming being in russet browns with moire ribbons of tete de negre hue and masses of roses. A becoming model has small ostrich tips in place of the flowers on its platform brim, which is tilted tremendously at the back by means of a deep bandeau composed of ribbons with long streamer ends.

St. Louis. Hebrue has decorated a home for invalids, costing \$100,000.

DURING JUNE, JULY, AND AUGUST STORE CLOSURE WEDNESDAY AT 1 P.M.

STOCKTAKING SALE

Ready for the 2nd Day of This Big Mid-Summer Economy Event
With a Score of Additional Savings
